

# HT'14

## Late-breaking results and Doctoral Consortium

### - Preface -

The late-breaking results allowed the late submission of papers presenting early results not yet ready for publication in the main track. We selected 2 out of 5 submissions for presentation. Furthermore, the doctoral consortium track allowed PhD students to receive feedback on their thesis proposals. From the submissions, we were able to select two high quality proposals. In the case of both tracks, the submissions were reviewed by a sub-set of program committee members.

## Organization

**Late-breaking results Chairs:** Carlos Castillo, Qatar Computing Research Institute (QCRI), Qatar.  
Jill Freyne, Commonwealth Scientific and Industrial Research Organisation (CSIRO), Australia

**Doctoral Consortium Chairs:** Martin Atzmueller, University of Kassel, Germany.  
Julita Vassileva, University of Saskatchewan, Canada.

**Program Committee:** Liliana Ardissono, University of Turin, Italy  
Maria Bielikova, Slovak University of Technology in Bratislava, Slovakia  
Leo Ferres, University of Concepcion, Chile  
David Garcia, ETH Zürich, Switzerland  
Tudor Groza, School of ITEE, The University of Queensland, Australia  
Eelco Herder, L3S Research Center, Germany  
Aidan Hogan, DCC, Universidad de Chile  
Sharon Hsiao, Columbia University, USA  
Giancarlo Ruffo, University of Turin, Italy
