

Table of Contents

XCCS diagram to CCS script Conversion Algorithm	1
<i>Krzysztof Balicki</i>	
A classifier based on a decision tree with verifying cuts	13
<i>Jan G. Bazan, Stanisława Bazan-Socha, Sylwia Buregwa-Czuma, Łukasz Dydo, Wojciech Rzasas and Andrzej Skowron</i>	
Classifiers for Behavioral Patterns Identification Induced from Huge Temporal Data	22
<i>Jan G. Bazan, Marcin Szpyrka, Adam Szczur, Łukasz Dydo and Hubert Wojtowicz</i>	
Programming Self-Assembly of DNA Tiles	34
<i>Marco Bellia and Eugenia Occhiuto</i>	
A Function Elimination Method for Checking Satisfiability of Arithmetical Logics	46
<i>Valentina Castiglioni, Ruggero Lanotte and Simone Tini</i>	
Exploiting Order Dependencies on Primary Keys for Optimization	58
<i>Michał Chromiak, Piotr Wisniewski and Krzysztof Stencel</i>	
Distributed Termination Detection by Counting Agent	69
<i>Natalia Garanina and Evgeny Bodyn</i>	
Differential Privacy and Security	80
<i>Damas Gruska</i>	
Verifying strategies in dialogue games	92
<i>Magdalena Kacprzak, Anna Sawicka, Katarzyna Budzyska and Marcin Dziubiński</i>	
An Upper Bound for the Reachability Problem of Safe, Elementary Hornets	101
<i>Michael Köhler-Bußmeier and Frank Heitmann</i>	
C-NBC: Neighborhood-Based Clustering with Constraints	113
<i>Piotr Lasek</i>	
Relative Constraints as Features	121
<i>Piotr Lasek and Krzysztof Lasek</i>	
Controlling Petri Net Behavior using Priorities for Transitions	126
<i>Irina Lomazova and Louchka Popova-Zeugmann</i>	
Incorporating BDI-Agent Concepts into Object-Oriented Programming . .	138
<i>Berndt Müller and Jack Betts</i>	

A Tractable Rule Language in the Modal and Description Logics that Combine CPDL with Regular Grammar Logic	150
<i>Linh Anh Nguyen</i>	
New inference algorithms based on rules partition	164
<i>Agnieszka Nowak - Brzezinska and Roman Siminski</i>	
Mining Real-Estate Listings Based on Decision Systems over Ontological Graphs: Extended Abstract	176
<i>Krzysztof Pancerz and Olga Mich</i>	
Timed Transition System Models for Programming Physarum Machines: Extended Abstract	180
<i>Krzysztof Pancerz and Andrew Schumann</i>	
Multi-agent heterogeneous intrusion detection system	184
<i>Mikulas Pataky and Damas Gruska</i>	
Coordination algorithm in hierarchical structure of the learning process of Artificial Neural Network	196
<i>Stanislaw Placzek and Bijaya Adhikari</i>	
Methods of calculating the strength of coalition in a dispersed decision support system with the stage of negotiations - a study of medical data ..	208
<i>Małgorzata Przybyła-Kasperek and Alicja Wakulicz-Deja</i>	
Fractional Genetic Programming with Probability Density Data	220
<i>Artur Rataj</i>	
Cut points in PEG	232
<i>Roman R. Redziejowski</i>	
Inverted fuzzy implications in approximate reasoning	237
<i>Zbigniew Suraj, Agnieszka Lasek and Piotr Lasek</i>	
Methods of translation of Petri nets to NuSMV language	245
<i>Marcin Szpyrka, Agnieszka Biernacka and Jerzy Biernacki</i>	
Time Process Equivalences for Time Petri Nets	257
<i>Irina Virbitskaite and Dmitriy Bushin</i>	
Traffic-related Knowledge Acquired by Interaction with Experts	269
<i>Piotr Wasilewski and Paweł Gora</i>	
SAT-based Bounded Model Checking for Weighted Deontic Interpreted Systems (Extended Abstract)	281
<i>Bożena Wozna-Szczesniak</i>	

A comparison of SAT-based and SMT-based bounded model checking methods for ECTL*	293
<i>Agnieszka Zbrzezny and Andrzej Zbrzezny</i>	
System Monitoring with Extended message sequence chart (Extended Abstract)	301
<i>Ming Chai</i>	
Granular floor plan representation for evacuation modeling	308
<i>Wojciech Swieboda, Van Mai Nguyen Thi and Hung Son Nguyen</i>	
Two Problems with Distributed Systems: Data Access Control and Memory Shering	311
<i>Ludwik Czaja (invited speaker)</i>
