

Petri Net Games, Examples and Quizzes for Education, Contest and Fun PeNGE 2025

A satellite event of the 46th International Conference on
Application and Theory of Petri Nets and Concurrency (Petri Nets 2025)
Paris, France, June 24, 2025

Preface

This workshop aims to attract short papers that present examples for the use of Petri nets for elegant modeling, analysis or problem solving. The examples should be comprehensible, self-contained and ideally demonstrate advantages of Petri net techniques compared to other approaches.

A particular objective of the workshop is the exchange of ideas, concepts and examples for teaching Petri nets.

The present proceedings contain four contributions presented at PeNGE 2025. These contributions covered the intended scope ideally. They range from puzzles to new concepts for Petri nets education.

We are grateful to all authors for their submissions and revised articles. We would also like to thank the program committee members and the additional reviewers.

We hope for interesting presentations and lively discussions at the workshop.

We are grateful to the organization team in Paris for their support.

June 2025
