

MULTITRUST

4th Workshop on Multidisciplinary Perspectives on Human-AI Team Trust

1. Introduction

This workshop originates from the need to create a multidisciplinary research community of people who study the different perspectives and layers of trust dynamics in teams consisting of both humans and AI agents. Three successful previous editions of this workshop ran in 2023 and 2024, and in the current edition aimed to continue this momentum to grow this community.

The workshop called for submissions describing the research interests and new, preliminary results of potential attendees. 6 Papers were submitted, of which 2 were accepted after review to ensure a topic-match with the workshop. Due to the small number of submissions, the organizers also took care of the reviewing as program committee.

During the workshop, the day was structured around community building. The two accepted papers were presented, but most of the day was spent in discussion groups working on specific topics. The discussions were structured, to hopefully lead to more future collaborations around the topic of trust in human-AI teamwork, and at the end of the day two concrete paper plans were in progress. The workshop was attended by around 20 people.

The website of this edition of the workshop can be found here: <https://multitrust.github.io/4ed/>

2. Organizers & Program Committee

Dr. Myrthe Tielman is assistant professor at Delft University of Technology working on responsible and trustworthy AI. Email: m.l.tielman@tudelft.nl, website: TU Delft Myrthe Tielman

Dr. André Meyer-Vitali is a senior researcher at DFKI (Saarbrücken, Germany) focused on engineering and promoting Trusted AI and is active in the AI networks Adra and CAIRNE (formerly CLAIRE), and previously in TAILOR. Email: andre.meyer-vitali@dfki.de, websites: DFKI André Meyer-Vitali / CERTAIN

Dr. Susanne Uusitalo Docent in applied philosophy and applied ethics, and is Senior Researcher in Ethics of Artificial Intelligence in Hybrid Intelligence research pro-

gramme at the University of Oulu, Finland. Email: susanne.uusitalo@oulu.fi, website: <https://www.oulu.fi/en/researchers/susanne-uusitalo>

Dr. Alessandra Rossi is Assistant Professor at the University of Naples Federico II, Italy. Email: alessandra.rossi@unina.it, website: alessandrarossi.net

Raffaella Esposito is a PhD student in Mind, Gender and Languages at University of Naples Federico II. Email: raffaella.esposito3@unina.it, website: researchgate.net/profile/Raffaella-Esposito-4)
