**3rd European Academic Workshop on
Electronic Human Resource Management**

20 – 21 May 2010, Bamberg, Germany

PREFACE

Dear e-HRM experts and colleagues,

I would like to welcome you warmly to the “Third European Academic Workshop on electronic Human Resource Management (e-HRM)”.

I am pleased to see that our Workshop has been established and is attracting a committed group of e-HRM practitioners and academics.

In order to tackle an obviously wide-spread scientific problem we decided for “Evidence-Based e-HRM? On the way to rigorous and relevant research.” as the major workshop topic. We hereby face the challenges of the rigor vs. relevance debate and intend to bridge research and practice by elaborating on the idea of evidence-based management in e-HRM.

After a prolific review process by our program committee we could select 23 quality papers, some of which directly, some rather indirectly refer to this topic. In particular, we received papers in the realm of Strategic Perspectives, HRIS Personnel, e-Recruitment, e-Learning and e-Competencies Management, Research Perspectives, Organizational Aspects, Cases and further miscellaneous issues and are looking forward to interesting presentations and discussions.

I am grateful to Theresa Welbourne (University of Southern California) and Uwe Simon (SAP) who agreed to be Key Note speakers to support and stimulate us.

In an established manner, the Workshop also includes a Practitioner Track. Besides, as a final part of the Workshop, a Scientist-Practitioner-Forum is planned to foster relevant future research.

I thank all authors for sharing their findings, all reviewers for their active support and I hope that all participants will profit from interesting discussions. I also thank our two sponsors, SAP (<http://www.sap.com/>) and DFG (<http://www.dfg.de/en/>) for supporting the funding.

Enjoy the conference and your stay in Bamberg.

Prof. Dr. Stefan Strohmeier

The 3rd European Academic Workshop on Electronic Human Resource Management is sponsored by

About SAP

Headquartered in Walldorf, Germany, SAP is the world's largest business software company – with more than 47,804 employees at sales and development locations in more than 50 countries worldwide.

Our global development approach focuses on distributing development across the world in strategically important markets. A global network of SAP Labs spanning Bulgaria, Canada, China, Germany, Hungary, India, Israel, and the United States enables SAP to operate locally, yet organize globally.

As the global technology research unit of SAP, SAP Research significantly contributes to SAP's product portfolio and extends SAP's leading position by identifying and shaping emerging IT trends through applied research and corporate venturing. SAP Research has highly skilled teams in 11 research centers worldwide.

About SAP ERP HCM

SAP ERP Human Capital Management (SAP ERP HCM) is a comprehensive, integrated human resources management solution that delivers unmatched global capability. The solution helps executives, human resources professionals, and line-of-business leaders to forecast, plan, and hire the best talent, as well as cultivate the skills of and train their workforce.

About DFG

The DFG is the self-governing organisation for science and research in Germany. It serves all branches of science and the humanities. Its membership consists of German research universities, non-university research institutions, scientific associations and the Academies of Science and the Humanities. The DFG receives the large majority of its funds from the states and the Federal Government, which are represented in all Grants Committees.

The 3rd European Academic Workshop on Electronic Human Resource Management is supported by the members of the Program Committee:

Bondarouk, Tanya	University of Twente, Enschede, The Netherlands
